

Questions to ask your doctor

- ✓ Am I at high risk for prostate cancer?
- ✓ If I took the PSA test and my result was high, what would you suggest next?
- ✓ Have there been any changes in how doctors use PSA testing?
- ✓ Are there any symptoms of prostate problems I need to watch for?
- ✓ What changes could I make to my habits to lower my risk of prostate problems?
- ✓ Are there any drawbacks to skipping the test for now and deciding later?
